## POEM

### Farewell My Friends

It was beautiful as long as it lasted,  
The journey of my life.  
I have no regrets whatsoever, Save the pain I'll leave behind.

Those dear hearts who love and care...  
And the strings pulling at the heart and soul...  
The strong arms that held me up  
When my own strength let me down.

At every turning of my life  
I came across good friends,  
Friends who stood by me  
Even when the time raced me by.

Farewell, farewell my friends,  
I smile and bid you goodbye.  
No, shed no tears for I need them not,  
All I need is your smile.

If you feel sad do think of me  
For that's what I'll like.  
When you live in the hearts  
Of those you love, Remember then you never die.

*Rabindranath Tagore (1861-1941)*

## COMMITTAL

### POEM

A Universe from Nothing: Why There Is Something Rather Than Nothing

“The amazing thing is that every atom in your body came from a star that exploded. And, the atoms in your left hand probably came from a different star than your right hand. It really is the most poetic thing I know about physics: You are all stardust. You couldn’t be here if stars hadn’t exploded, because the elements - the carbon, nitrogen, oxygen, iron, all the things that matter for evolution - weren’t created at the beginning of time. They were created in the nuclear furnaces of stars, and the only way they could get into your body is if those stars were kind enough to explode, the stars died so that you could be here today.”

*Lawrence M. Krauss*
